Fidelity MSCI Emerging Markets Index Fund

a sub-fund of Fidelity UCITS II ICAV

P-ACC-Euro (ISIN: IE00BYX5M476)

This fund is managed by FIL Investment Management (Luxembourg) S.A.

Objectives and Investment Policy

- The fund aims to provide investors with a total return, taking into account both capital and income returns, which reflects, before fees and expenses, the return of the MSCI Emerging Markets Index (the "Index").
- For more information on the Index, please refer to the publicly available information on the index provider's website at <https://www.msci.com/index-methodology>.
- The investment policy of the fund is to track the performance of the Index as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the fund's performance and that of the Index.
- The fund may use forward foreign exchange contracts and currency futures for currency hedging purposes, and equity index futures for cash equitisation (i.e., an investment for the fund's cash holdings).
- Income is accumulated in the share price.
- The fund uses a benchmark "index tracking" (also known as "passive") investment management approach by tracking the Index.
- Shares can usually be bought and sold each dealing day of the fund.
- Note: The fund described herein is indexed to an MSCI index. The Index is designed to reflect the performance of large and mid-capitalisation companies across emerging market countries which comply with MSCI's size, liquidity and free float criteria. These criteria are designed to identify those companies whose securities make up 85% of the publically traded market. The fund referred to herein is not sponsored, endorsed, or promoted by MSCI, and MSCI bears no liability with respect to any such funds or any index on which the fund is based. The prospectus and relevant supplement contain a more detailed description of the limited relationship MSCI has with Fidelity and any related funds.

Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean a "risk free" investment.
- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.
- Currency hedging may be used which aims to reduce the effect of such changes. However, the effects may not be completely eliminated to the degree expected.
- Liquidity is a measure of how easily an investment can be converted into cash. Under certain market conditions assets may be more difficult to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.
- Emerging markets may be more volatile and it could be harder to sell or trade securities. There may be less supervision, regulation and less well-defined procedures than in more developed countries. Emerging markets can be sensitive to political instability, which can result in greater volatility and uncertainty, subjecting the fund to the risk of losses.

Charges for this fund (ISIN: IE00BYX5M476)

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
