Fidelity Japan Equity Fund

a sub-fund of Fidelity Common Contractual Fund II

G-ACC-JPY (ISIN: IE00BMX6F472)

This fund is managed by FIL Investment Management (Luxembourg) S.A.

Objectives and Investment Policy

- The fund aims to achieve long-term capital growth.
- The fund will seek to achieve its objective by obtaining exposure to a diversified portfolio at least two thirds of which will be exposed to shares or related securities of companies that have their head office or a main part of their activity in Japan.
- The fund will not actively focus on any specific geographic region within Japan, industry sector or market capitalisation.
- The fund may also invest on an ancillary basis, in investment grade government and corporate bonds and convertible bonds, and for cash management purposes in cash and cash equivalents.
- The fund may invest in assets directly or achieve exposure indirectly through other eligible means including derivatives. The fund can use derivatives with the aim of risk or cost reduction or to generate additional capital or income, including for investment purposes, in line with the fund's risk profile.
- The fund is actively managed and references the Tokyo Stock Exchange TOPIX Total Return Index (Net return) (the "Benchmark").
- The Investment Manager has a wide range of discretion over the composition of the fund's portfolio. It may take exposures that are not included in, and that have different weightings from, the Benchmark. Therefore, there are no restrictions on the extent to which the fund's performance may deviate from that of the Benchmark.
- The Investment Manager may set internal guidelines which, in turn, may reference deviations from the Benchmark.
- The Investment Manager has appointed a number of discretionary investment advisers as its delegates and will allocate some or all of the fund's assets to such advisers.
- Units can usually be bought and sold each business day of the fund.
- Income is accumulated in the unit price.

Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean a "risk free" investment.
- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.
- Currency hedging may be used which aims to reduce the effect of such changes. However, the effects may not be completely eliminated to the degree expected.
