# The United States Dollar Treasury Fund

#### a sub-fund of Fidelity Institutional Liquidity Fund plc

Class A Accumulating Shares (ISIN: IE00BMY47889)

This fund is managed by FIL Fund Management (Ireland) Limited

### Objectives and Investment Policy

- The fund aims to maintain capital value and liquidity while producing a return for investors in line with money market rates.
- At least 99.5% shall be invested in US Treasury obligations (which are money market instruments issued or guaranteed by the US Treasury and payments of principal and interest thereon which are backed by the full faith and credit of the US government), reverse repurchase agreements secured by such instruments and cash (including deposits).
- The fund may also invest in high quality securitisations and assetbacked commercial paper, deposits with credit institutions, repurchase agreements and units or shares in money market funds.
- The fund is actively managed without reference to a benchmark.
- Investments will have a credit quality consistent with maintaining Moody's Aaa-mf rating and a rating of AAAm by Standard & Poor's for the fund. Such ratings were solicited by the manager of the fund and financed by either the manager or the fund.
- Income (whether positive or negative) will be retained in the share class and will be reflected in the value of your investment.
- Shares in the fund can be bought and sold on any day on which the banks are open for normal banking business in London and same day settlement of the proceeds for subscriptions and redemptions is facilitated by electronic funds transfer.
- The fund is a Public Debt Constant Net Asset Value Money Market Fund and operates as a Short-Term Money Market Fund.

#### Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean a "risk free" investment.
- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- There is a risk that the issuers of bonds may not be able to repay the money they have borrowed or make interest payments. While we seek to mitigate this, the fund may be exposed to the risk of financial loss if it invests into an instrument issued by an entity that subsequently defaults on its borrowings. Losses may also be realised if an entity that the fund is exposed to ceases to make interest payments over a period of time or indefinitely. Bond prices have an inverse relationship with interest rates such that when interest rates rise, bonds may fall in value. Rising interest rates may cause the value of your investment to
- Investment in a Money Market Fund is different from an investment in deposits, in particular, the principal invested in a Money Market Fund may fluctuate and the risk of loss of the principal is to be borne by the investor.
- The fund is not a guaranteed investment. It does not rely on external support for guaranteeing the liquidity of the fund or stabilising the net asset value of shares in the fund.
